

The Climate Change Hoax and the New Ten Commandments

by Jeremy James

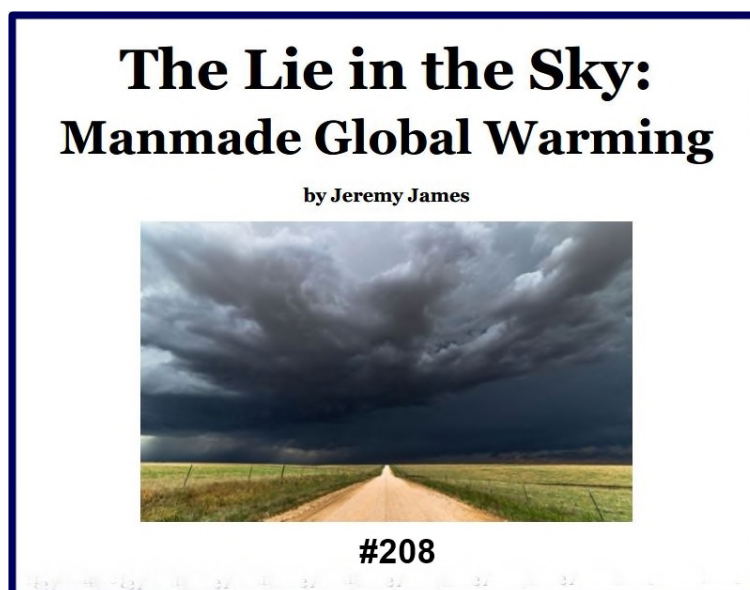

The Enemy has devised a system of lies which is difficult to deconstruct. It is not like a Jenga Tower where the random removal of a series of blocks will cause it to collapse. Rather, it is more akin to a giant Lego pyramid where a large number of individual units must be carefully detached before even a small block of pieces can be taken out.

Only those who love truth will bother to do this. There is too much effort involved. And yet the deadly explosive device concealed beneath the pyramid will not be exposed in any other way. This device is the Antichrist himself, with his seductive, wonder-working persona. For this is how Satan, **“which deceiveth the whole world” (Revelation 12:9)**, will get most of humanity to worship his ‘son’.

We have already written about the climate-change hoax:

We would encourage those of our readers who are not already familiar with the bogus science behind 'climate change' and 'global warming' to read our earlier paper before proceeding with this one.

The nonsensical mumbo-jumbo known as 'climate change'

There are a many arguments or proofs which show that manmade climate change is entirely without validity. For example, one of the most often quoted outcomes of 'global warming' is the inevitable melting of the polar icecaps and the subsequent inundation of the highly populated coastal regions of the earth. The cunning deceivers who came up with this nonsense have been relying throughout on the gullibility of the public. Everyone knows that waters freezes at zero degrees celsius. Once it turns into ice it remains in that solidified state until the ambient atmospheric temperature rises above zero. However, the average temperature of the Antarctic landmass varies between -40 and -60 degrees for most of the year. This means the atmospheric temperature must rise by that amount – 40 to 60 degrees – before it can ascend above zero! A two degree increase in the average global temperature would have virtually no impact whatever on the Antarctic icecap!

The uber-rich know this. They know the sea level will remain constant for years to come. This is why they continue to build highly expensive properties close to sea level in places like Florida and the Caribbean.

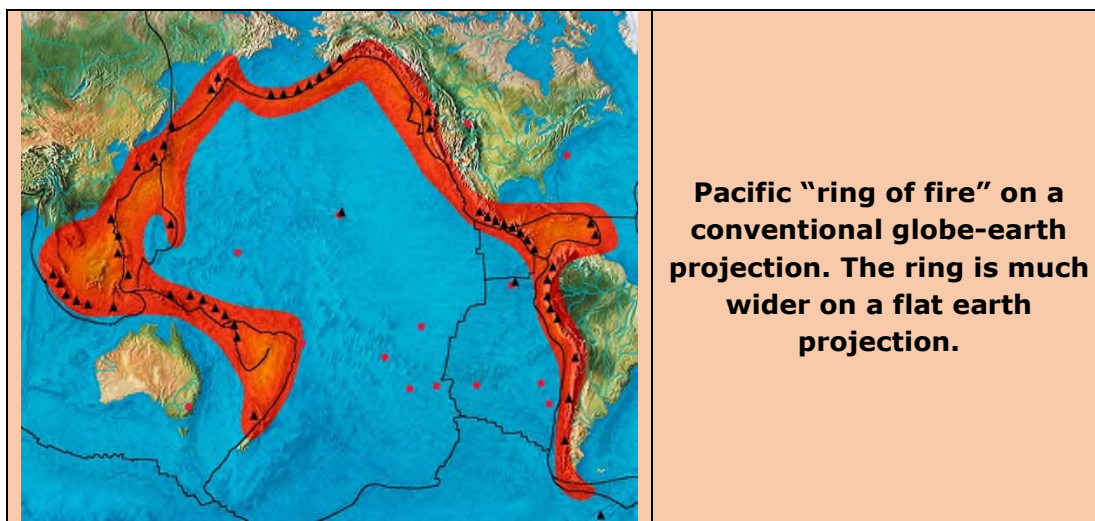

The concept of a 'greenhouse gas' is nothing but stage magic, a prop on which to hang a bogus science. The only gas that reflects sunlight – and, by implication, solar radiation – to any meaningful extent is water vapor or H₂O. And it does this simply because the volume of water vapor that concentrates close to the earth's surface in the form of clouds is prodigious. The sun is constantly heating the surface of the oceans and producing unquantifiable amounts of water vapor, billions of times in excess of any other gas entering the atmosphere.

Any theory of atmospheric warming through a ‘greenhouse’ effect MUST be based on the dynamics of cloud production, distribution, elevation and color (albedo). The contribution, if any, by other gases, including carbon dioxide and methane, is utterly insignificant in comparison!

We are never told any of this because the few scientists who try to reveal the truth about this revolting lie are never given a platform in the media. If they persist in their attempts to alert the public, they risk being dismissed from their posts or losing access to research grants.

The main source of methane gas

Let’s imagine for a moment that methane – allegedly the most potent of all the ‘greenhouse’ gases – was capable of exercising a measurable greenhouse effect. In order to estimate the human contribution to the annual increase in atmospheric methane (disregarding the amount of methane sequestered and thus neutralized by a variety of organic processes operating continuously in nature), we would need to quantify the amount of methane entering the atmosphere from other sources. By far and away the greatest source of atmospheric methane is volcanic! The human contribution, whether industrial or agricultural, is miniscule in comparison. The Ring of Fire alone, which comprises a long series of volcanoes and active volcanic vents, including a great many submarine vents around the rim of the Pacific, releases more methane in a day than mankind produces in a year.

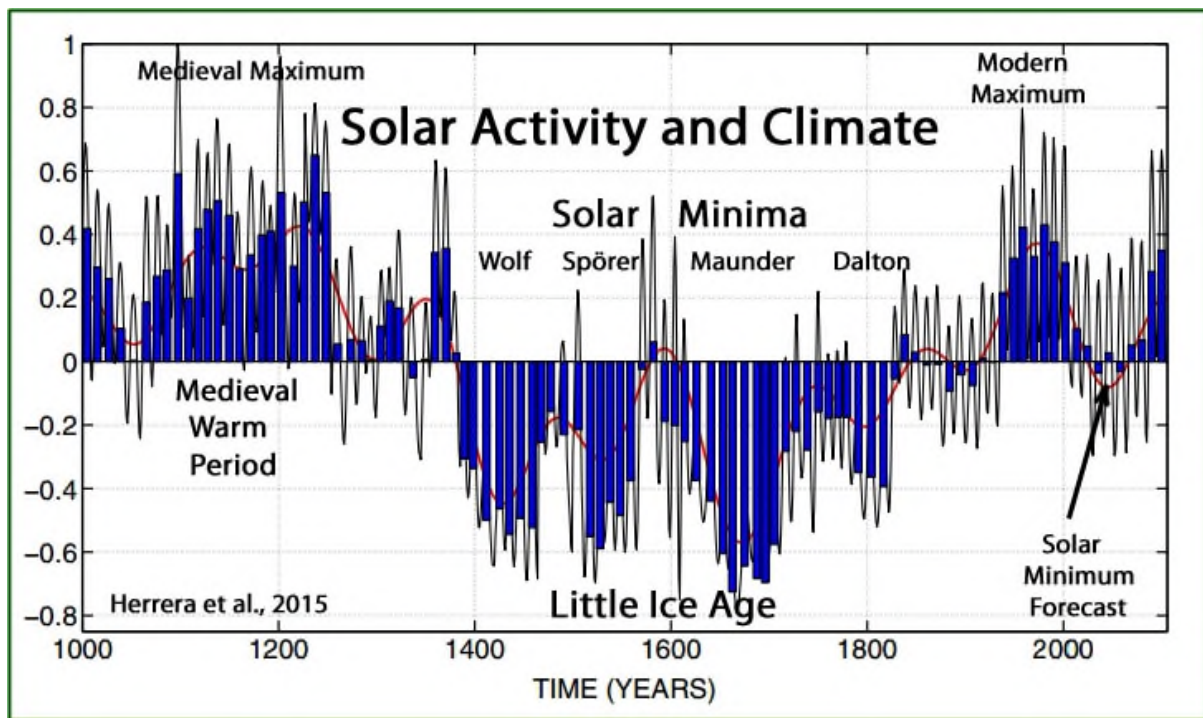

The lies run and run. It doesn’t matter how brazen they are. So long as they are repeated over and over in the media, and connected in the public mind with images of impending climatic catastrophe, the average person will believe them. One would expect science majors and graduates, along with engineers and others with a grounding in evidence-based reasoning, to smell a rat and ask hard questions. But they don’t. They have been conditioned from an early age to respect the integrity of science and have immense difficulty believing that world-class scientists would lie.

We have here a variation of the Santa Claus dilemma. Even when a child can plainly see the glaring contradictions in the Santa Claus hypothesis, he continues to believe it because the alternative – “Hey, my parents are liars” – is just too hard to accept.

Future solar output is unknowable

Another massive variable in any predictive model is future solar output. And this is unknowable. Climatic variations in the past, notably the Medieval Maximum and the Maunder Minimum, were produced by an increase and a decrease, respectively, in the total amount of solar energy produced by the sun during the relevant periods (roughly 950 to 1200 AD and 1570 to 1720 AD). We have no idea how much total energy the sun will release in any given year (or decade!) over the next seventy years. Therefore it is impossible to predict – as the UN pretends to do – the average global temperature using a climatological model, even one that is designed to a very high standard. This means that all such predictions by any of the international expert groups, academic institutions and scientific establishments are bogus! ALL of them, without exception.

The Satan-inspired ‘carbon footprint’

Perhaps the most insidious aspect of the ‘global warming’ hoax is its vilification of carbon dioxide, a gas that is central to human, animal and plant metabolism.

To assign a “carbon footprint” to anyone is to fix a manacle around his ankle. Under the UN plan, the amount of CO₂ that one is permitted to produce, which can be calculated online from his or her total annual consumption of a variety of goods and services, will be decided by the state. This “allowance” will impose radical restrictions on his freedom of movement, the kinds of food he can consume, and the types of activity he can engage in.

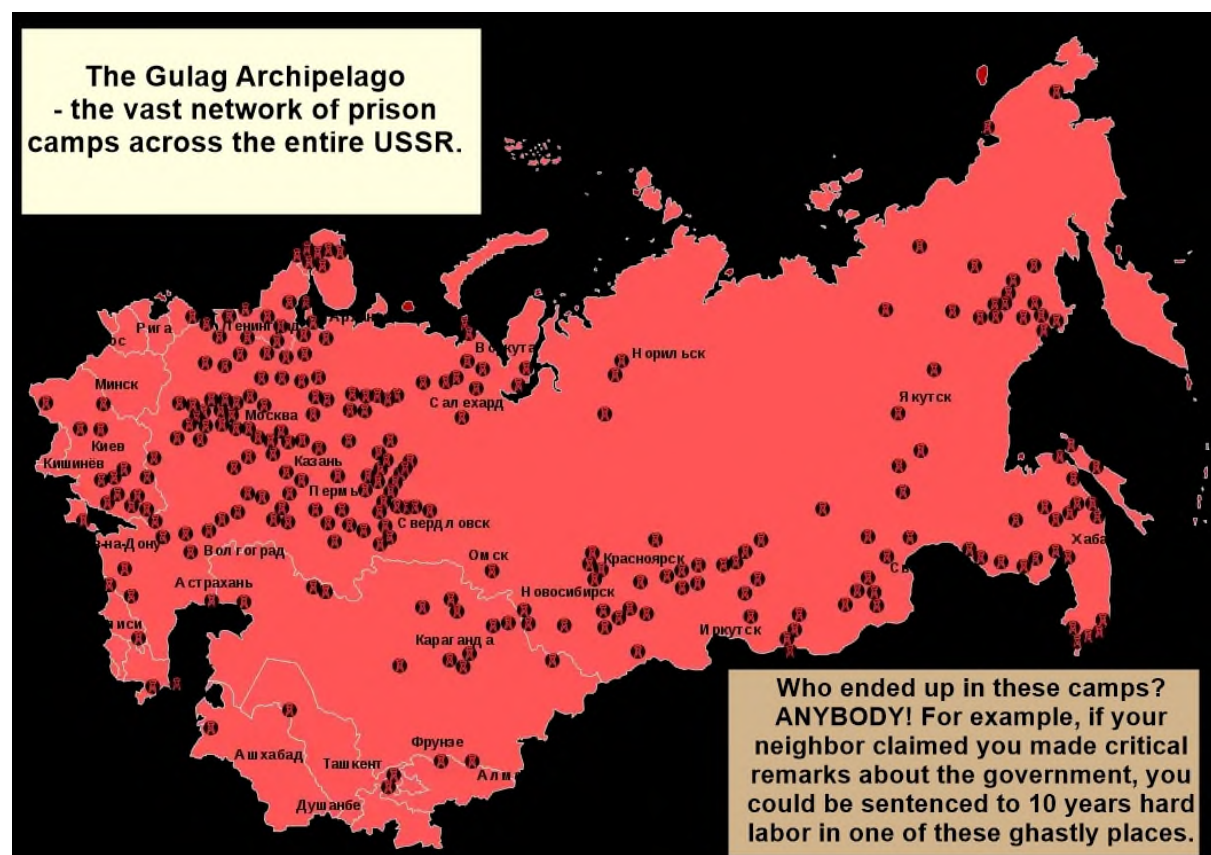

If stringent national “carbon” targets are set, and personal allowances are defined accordingly, most of the population will be living in small, poorly heated dwellings, subsisting on a low calorie diet, eating sub-standard protein products, and commuting to work on bicycles. The slum barrios and favelas of certain Latin American cities will become commonplace across Europe and North America.

This is the future that the Davos elite have planned for our children! They will be enslaved by an asinine “save the earth” ideology which consists of nothing but lies, idiotic pseudo-science, and shameless propaganda.

The lifestyle envisaged for this slave caste – which will comprise most of mankind – will be computed by reference to industrial productivity. As soon as an individual’s economic utility falls below a certain threshold, he will be terminated. Elderly people will be classified as unnecessary consumers of the earth’s resources. Since they no longer serve a ‘productive’ purpose, our children will be taught from an early age to regard voluntary euthanasia as an altruistic act. When *their* time comes most of them will voluntarily swallow the kill pill.

The New World Order is a Marxist tyranny

We could say a great deal more about this totalitarian nightmare, but one only has to look at the atrocities committed by Marxist regimes in the 20th century to see where this is all leading. As with those regimes, a twisted ideology is being used to brainwash the masses and concentrate absolute power in the hands of a self-appointed elite.

The *greenhouse* prison system

Before this brutal system is imposed, the wicked lie of climate change will likely be used to implement lesser forms of totalitarian control, the most obvious of which are ‘climate lockdowns’. These could commence at any time, with the UN or another international body declaring that analysis of fresh scientific data has revealed a horrifying acceleration in a critical climate-change indicator. For example, unless we act immediately and take drastic action NOW, the North Atlantic Conveyor will shut down in less than 5 years and most of Europe and the western seaboard of North America will freeze, or, according to another phony indicator, all the plankton in the southern oceans will die, killing two thirds of all marine life on earth, or ... well, you get the idea. As long as it sounds ‘scientific’ and gets the backing of dozens of eminent scientists who look like they are scared half to death by this impending catastrophe, John and Jane Doe will lap it up.

If the governments of the world then insist that rolling lockdowns are needed to effect a drastic and immediate reduction in the total amount of greenhouses gases being produced across the earth as a whole, a large proportion of the population will co-operate, while those who doubt either the “problem” or the “solution” – and resent the lockdowns – will be marginalized by government rhetoric and allegations in the media of selfishness and/or stupidity – *We must all do our bit to save the planet!*

This is the Covid scam all over again, only this time it will take “two months” to flatten the curve. (If two weeks can turn into two years under the Covid scam, then “two months” could easily run for ten years.)

The self-appointed elite or secret world government

Representatives of the self-appointed elite met in Sharm El Sheikh in November at an event known as COP27, the UN Climate Change Conference. Egypt was host to about 190 countries, each of which is controlled by a dynastic cabal which fully supports the New World Order agenda. What we are seeing today is the implementation, step-by-step, of a sweeping transformative plan which was formally agreed by all UN member states at the so-called Earth Summit in Rio de Janeiro in 1992.

The COP Conference was preceded by a number of high profile meetings in other countries, presumably to build momentum for the main event. Significantly, one of these took place in London, in the royal residence of King Charles III. Before succeeding to the throne, Charles made the opening address at the previous COP conference in Edinburgh in 2021. His alarmist comments at that event show where he stands on this issue. He said the “existential threat” of climate change was so great that we must be prepared “to put ourselves on what might be called a war-like footing... time has literally run out... we need a vast military style campaign... many of your countries I know are already feeling the devastating impact of climate change through ever increasing droughts, mudslides, floods, hurricanes, cyclones, and wildfires...” He also referred to the “trillions” of dollars that will have to be diverted to finance climate change initiatives. This will necessitate a radical transformation across all sectors, notably “energy, agriculture, transportation, [and] health systems.”

King Charles is not just a mouthpiece for the New World Order but an ardent advocate of the program of change which will cause immense upheaval and suffering across all nations. He takes an active interest in the climate change agenda and appears to perform an important leadership role. In short, the new sovereign is a dangerous man.

King welcomes world leaders and environmentalists ahead of Cop27

Charles will miss the gathering of world figures in Egypt next week but discussed climate change with guests invited to his royal residence.

**Extract from an article in
The Belfast Telegraph.
King Charles meets the new
UK Prime Minister, Rishi Sunak.**

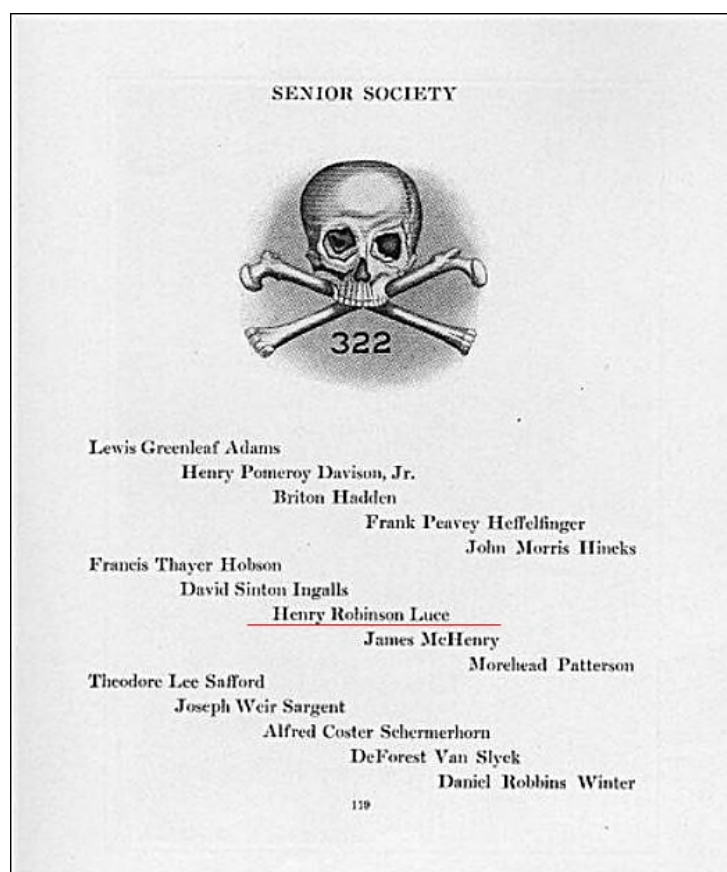

**Sunak is married to Akshata Murthy,
daughter of Narayana Murthy,
the Indian billionaire who co-chaired
the World Economic Forum with
Klaus Schwab in Davos in 2005.**

Another preliminary meeting was held in Jerusalem a few days before COP27. This meeting, like a similar one in London (see below), was designed to link climate change with religious conviction. The architects behind the New World Order want to create a unified world religion and are using 'climate change' as a hook on which to hang a number of interfaith principles. These can then be used later as a lever to prise open and reinterpret the dogmas and doctrines of the various religions, based on the care and stewardship of 'Mother Earth.'

The Interfaith Center for Sustainable Development, which is funded by the Henry Luce Foundation, is playing a co-ordinating role in this initiative:

Henry Luce, who co-founded Time Magazine, was a member of the occult Skull & Bones society at Yale:

Membership roll of the Skull & Bones society at Yale, 1920.

Source: en.wikipedia.org/wiki/Skull_and_Bones#/media/File:Skull_and_Bones_Class_of_1920.jpg

Everything to do with climate change stinks of Illuminati planning, Illuminati money, and Illuminati antichrist beliefs. Another ‘Bones man’, John Kerry, attended the pre-COP meeting with King Charles:

King Charles, Rishi Sunak, Stella McCartney and John Kerry

The religious leaders who attended the interfaith event in Jerusalem included the Vatican Ambassador to Israel and Cyprus, Archbishop Adolpho Yllana, and the founder and director of the Interfaith Center for Sustainable Development, Rabbi Yonatan Neril:

Representatives of the world religions also met on Parliament Hill in London before COP27 to conduct a “repentance ceremony” based on *Ten Universal Principles of Climate Justice*. The former Archbishop of Canterbury, Dr Rowan Williams – who is also an initiated Druid – was a leading speaker at that event: “As religious leaders we offer our voice as a contribution to the gathered leaders [at COP27] and to humanity,” he said. “We must also confront honestly the destructive habits which continue to limit the possibilities and the hopes of human beings, in a call for wake up and self-examination.”

The arrogance of these people is quite astonishing at times. While in Egypt, under the auspices of the Interfaith Center for Sustainable Development (ICSD), a number of religious leaders and representatives made the journey to Mount Sinai to conduct yet another “repentance ceremony”. They chose this immensely important historical location to announce to the world their *Ten Universal Principles of Climate Justice*. Originally they called these the “New Ten Commandments” but decided that this was a step too far and seem satisfied (for now) to call them merely an *Addendum* to the Ten Commandments!

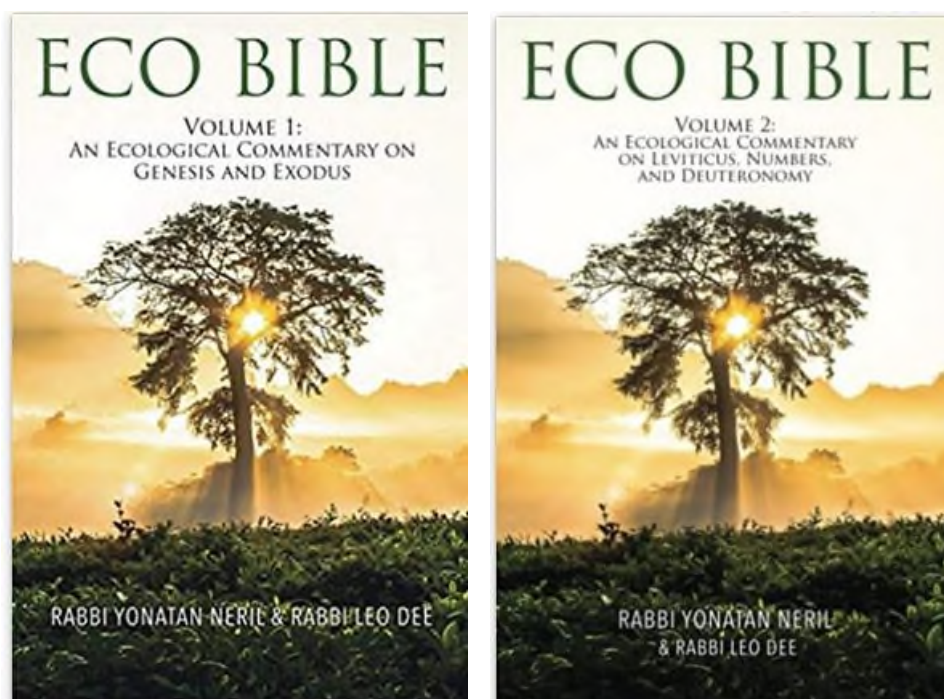

The Sinai event got a special mention on the front page of the ICSD website:

We come to Sinai in a movement of repentance and quest. We seek a new vision for humanity and its endangered existence, and we seek to receive and amplify a message of life-sustaining living and habits that humanity needs to hear today. In this spirit, the project partners brought together premier religious leaders from the world’s major religions to put forth a prophetic interreligious call to action: “Ten Universal Principles for Climate Justice.”

Before we examine these “Principles” we should note that the ICSD has published what it calls an Eco Bible, or an ‘Ecological Commentary’ on the first five books of the Old Testament, drawing on Jewish Midrash and rabbinical sources. We can get a flavor of what these two volumes are designed to do from a review posted online by Rev. Dr. Rachel Mash, Environmental Coordinator, Anglican Church of Southern Africa:

“The current ecological disasters cause us to return to our roots to revive the ancient truths of our faith that have been hidden by modern consumerist society. What a gift to be able to delve into the Hebrew Bible guided by thousands of years of wisdom of Jewish rabbis and explore anew the roots of our faith.”

It is being marketed as a wisdom book which reveals the “ancient truths” which Christians of the past two thousand years have overlooked. We can see here a dual objective, namely to Judaize Christianity – a long-term goal of the Illuminati – and to turn God’s Word into an ecological guidebook, a manual on sustainability and ecological wisdom.

According to Amazon, “Eco Bible has been a #1 bestseller on multiple Amazon Kindle categories.”

We can expect more works of this kind to receive glowing endorsements, where the Bible is reinterpreted systematically by modern experts to support the paganized Christianity of the coming One World Religion.

Ten Universal Principles of Climate Justice

We’ll now examine the blasphemous Ten Principles which are set out in **Appendix A**.

Anyone who goes to Sinai and presumes to be able to add an ‘Addendum’ – of any kind – to what God has said is an enemy of truth. Luciferians take great delight in mocking God and misusing His Word for their own nefarious purposes.

It is hardly necessary for us to analyze each principle to see that the entire compendium is an amalgam of Buddhist, Hindu, and New Age beliefs held together by a pantheistic worldview, climate anxiety, pseudo-science, and a marked absence of any belief in God's providential care for His creation.

It could have been written by the Dalai Lama. Perhaps it was.

The 'God' of this document is not the LORD God of the Bible but a remote, impersonal being who supposedly permeates creation in a mysterious way – “permeated by God's presence and being.”

Christ and the Holy Spirit are completely disregarded.

There is hardly a single statement in this pantheistic creed which accords with Biblical truth. To associate this pagan manifesto with the site where the Ten Commandments were given to mankind is the height of blasphemy.

We need to bear in mind that this 'ceremony' on Mount Sinai was an integral part of the COP27 program and that the neo-pagan, pantheistic worldview which underpinned it is fully endorsed by the UN and shared by all world leaders.

The proposed 'Third Covenant'

Alex Newman of *The New American* attended COP27 as an accredited journalist and managed to interview a number of key players who spoke quite openly about their plans. Seemingly they did not realize that Mr Newman was not an advocate of UN policy. One of his interviewees was James Sternlicht, CEO and co-founder of The Peace Department (which has partnered with the Elijah Interfaith Institute). At 2:37 in the video [link below] he states that he and his colleagues are “working on” a “Third Covenant” – which apparently will supersede the Old and New Covenants!

<https://thenewamerican.com/at-un-religious-leaders-explain-addendum-to-10-commandments-third-covenant/>

COP27 attendees are all supporters of the New World Order

Any nation that attended COP27 is fully committed to the imposition of a totalitarian system of control across the world as a whole. For example, those Italians who think their new Prime Minister, Giorgia Meloni, is opposed to the New World Order, should think again:

So too should any Irish person who thinks their Taoiseach (Prime Minister), Micheál Martin, believes in freedom and democracy or the well-being of the Irish people:

| | | |

| A photograph of Micheál Martin, the Irish Taoiseach, being interviewed by RTE. He is wearing a dark suit and a blue tie, and is making a hand gesture with his fingers spread. | <p>The Irish prime minister being interviewed by RTE, the national television network, after his talk to world leaders at Sharm El Sheikh.</p> <p>Note the deliberate hand sign, denoting his membership of this international cabal.</p> <p>This hand sign is sometimes called 'the salutation to the rising sun'. Angela Merkel used it numerous times.</p> | A photograph of Angela Merkel, the German Chancellor, making a hand gesture with her fingers spread, which is referred to as the 'triangle of power' hand sign. |
|--|--|---|

Furthermore, the Catholics of Ireland and elsewhere can jettison any hope that the Vatican might bring a glimmer of sanity to this bedlam. It was represented at this event by its Secretary of State, the most senior figure in the 'Holy See' after the Pope. Cardinal Parolin told the assembled leaders that the Vatican wanted even greater migration between nations: "...it is important to recognize migration as a form of adaptation and to increase the availability and flexibility of pathways for regular migration." The architects of the New World Order are using migration as a weapon, both to undermine the national identity of recipient nations and to siphon off their wealth.

Cardinal Parolin, Secretary of State for the Vatican

Trillions in compensation for supposed “loss and damage”

Cardinal Parolin also reminded his audience that the Vatican signed the Paris Agreement of 2015 which included among its objectives the payment in due course of substantial financial compensation to developing countries for “loss and damage” caused by climate change. These payments would be made by the industrialized countries which were allegedly responsible for causing the greenhouse effect that supposedly led to many climate-related disasters, such as flooding and drought, in developing countries.

So, the Vatican is advocating both the massive transfer of wealth out of Europe and N America and the massive transfer of impoverished, unskilled foreigners into Europe and N America. Does this make any sense? Only if the Vatican is run by a Marxist regime and rejects the Biblical prohibitions on theft and mass racial integration. Have no doubt, the rank and file in the Catholic Church are being grievously deceived by their leaders.

Americans, too, should be greatly concerned that their President attended COP27! Seemingly this is not generally known, largely because the mainstream media in the US failed to cover this story. Their ageing, fragile leader made the long trip to Egypt to address the assembled world leaders and express his wholehearted support for an international program that will greatly harm the American economy and the American people – and the mainstream media in the US said nothing!

President Biden, plus some of the other national leaders present at COP27: UK (Prime Minister Sunak), France (President Macron), President of the EU Commission (Ursula von der Leyen), South Africa (President Ramaphosa) and Germany (Chancellor Scholz).

CONCLUSION

What are these Marxists imposing on the world? De-industrialization, decarbonization, reduced energy consumption, carbon taxes, massive compensation payments to 'developing' nations, escalating heating and air-conditioning charges, regional and international travel restrictions, reduced food variety, quality and availability, limited access to motorized transport, and the unregulated influx of 'refugees' from third world countries. Increased energy costs generally will cause runaway inflation which, by itself, will be very damaging. To this may be added a major campaign in the media and elsewhere to portray climate change as a "spiritual crisis" requiring a radical revision of spiritual values and ethical norms. In short, a new "moral code" (per the UN *Human Development Report 2021-2022*).

This is what has been agreed so far and made public. No doubt, more draconian elements will be disclosed as the program is implemented. Climate lockdowns of some kind can be expected. So too can increased police brutality as protesters are beaten and imprisoned for trying to protect their freedoms and their property.

The following appeared in *The Guardian* on 30 November 2022:

The Dutch government is offering to buy out up to 3,000 “peak polluter” farms and major industrial polluters in an attempt to reduce ammonia and nitrogen oxide emissions that are illegal under EU law.

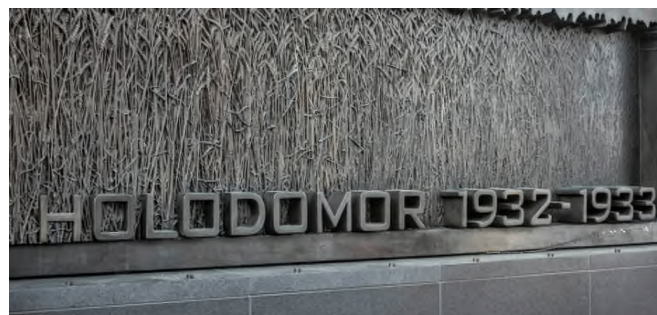

The nitrogen minister, Christianne van der Wal, said farmers would be offered more than 100% of the value of their farms to quit. For the first time, the government has said that forced buyouts will follow next year if the voluntary measures fail.

Note how the farmers are classified as “peak polluters”, even though they are merely doing what they have always done, producing food in a time-honored, sustainable way. But since the EU Commission (under von der Leyen) has now defined ammonia and nitrogen as atmospheric pollutants, farming itself is deemed to be a threat to the planet! The evil behind this is quite extraordinary. It is impossible to farm the land without producing or making use of nitrogen and ammonia. Thus the EU Commission is criminalizing the very means by which food is produced!

As the Word of God says of the wicked: **“The beginning of the words of his mouth is foolishness: and the end of his talk is mischievous madness.” (Ecclesiastes 10:13).** When farming, the oldest and most essential of all human occupations, is classified as a threat to life on earth, we know for certain that we are now dealing with “mischievous madness.”

The Dutch have even appointed a “nitrogen minister” to oversee this barbaric program! Farmers will be offered more than the current market price for their farms, but if they refuse to sell them to the government, they will be purchased compulsorily. We are reminded here of Naboth’s vineyard, which we discussed in our last paper [#333]. King Ahab wanted the land and offered a fair price for it, but Naboth didn’t want to sell it. So the king’s wife used deadly force to get it.

This vicious tactic is akin to the method that Stalin used to murder millions of peasants in the Ukraine in the 1930s. He sent in armed henchmen to take all available food, including the grain needed for the following year’s crop. Those in the western media who knew this was happening said nothing. The suffering caused by this awful event, known to history as *The Holodomor*, was indescribable. Even Stalin’s supporters were shocked by its brutality.

The Luciferian cabal which organized COP27 are using the mountain of lies known as 'climate change' to impose onerous and destructive policies on all nations. The Netherlands is a test case. If they can subjugate Dutch farmers with their Stalinist methods, the way is clear to tyrannize the rest of Europe. The Dutch government has already indicated that it intends to reduce the national livestock by 30% by 2030. This means it plans to shut down far more than the 3,000 farms already under attack.

Dutch Prime Minister, Mark Rutte, speaking at COP27

Is this criminal? Of course it is! It ought to be obvious to the world at large that the Dutch Prime Minister, Mark Rutte, and his entire cabinet are working for the New World Order and will use whatever force is necessary to impose their will.

LEFT: Dutch farmers stage a mass protest against the government.

RIGHT: A Dutch policeman forces a farmer out of his tractor at gunpoint

While the UN and COP27 are pointing towards the development of a new moral code, one which inserts an ‘Addendum’ to the Ten Commandments, and even has the arrogance to “work on” a *Third Covenant*, they have no difficulty enforcing their policies at gunpoint.

World leaders assemble for a group photo at COP27.

Until the populations of Europe and N America realize that their democracies have collapsed, these deceivers will continue with their treasonous program. All of the leaders in the photo above are **“workers of iniquity, which speak peace to their neighbours, but mischief is in their hearts.” (Psalm 28:3).**

Christians need to wake up and recognize who these people really are, namely dedicated servants of Satan, who despise Christianity, who loath Christ, and who are working together – in plain view! – to destroy every remaining trace of Biblical truth here on earth and replace it with a ‘New World Order’. This is the Antichrist Agenda, plain and simple.

[We will end with the closing section of our previous paper (#208)]:

The Word of God

The Word of God tells us that global warming, with the catastrophic consequences that ‘science’ is predicting, will never happen.

After the Flood, the LORD made a covenant with both man and the animal kingdom. He promised never to send another devastating flood upon the earth. What is more he sealed His promise with a special sign or token, the great arc of the rainbow. This sign would have had no meaning unless it was completely new, an atmospheric phenomenon that had never previously been observed:

“And I will establish my covenant with you; neither shall all flesh be cut off any more by the waters of a flood; neither shall there any more be a flood to destroy the earth.

And God said, This is the token of the covenant which I make between me and you and every living creature that is with you, for perpetual generations: I do set my rainbow in the cloud, and it shall be for a token of a covenant between me and the earth.

And it shall come to pass, when I bring a cloud over the earth, that the rainbow shall be seen in the cloud: And I will remember my covenant, which is between me and you and every living creature of all flesh; and the waters shall no more become a flood to destroy all flesh.

And the rainbow shall be in the cloud; and I will look upon it, that I may remember the everlasting covenant between God and every living creature of all flesh that is upon the earth.

And God said unto Noah, This is the token of the covenant, which I have established between me and all flesh that is upon the earth.” (Genesis 9:11-17)

Please reflect on this. The LORD of Creation put something entirely new in the sky as a token of His mercy, something that all living creatures could see and appreciate. It would be a comfort and a consolation thereafter to the spirit of man to know that nothing akin to this fearful judgment, this deadly inundation, would ever again sweep over the earth.

However, the Enemy has put a lie in the sky where the LORD had placed a rainbow. For the LORD, the rainbow is a token of His mercy, but Satan wants to turn it into a symbol of sodomy and sexual perversion, a badge for the LGBTQ+ agenda. This is the age we are now living in.

According to the worse-case scenario projected by the warming alarmists, the natural cycle of the seasons will be overturned by climate change. While they do not seem to be sure what shape this unseasonal upheaval will take, they are adamant that it will mark a radical departure from what we have known to date. But this is not what the Word of God says. As an appendix to His promise to preserve mankind from a further widescale inundation, the LORD reassuringly added that **“While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease.” (Genesis 8:22)**

The Illuminati are loath to accept that God has placed tight constraints on what Satan can do. Their 'god' is not the all-powerful being that they would like to believe. Despite his great powers, he is a created being and nothing more. So, when our Creator decrees that the cycles of seedtime and harvest, cold and heat, summer and winter, and day and night, will continue indefinitely, that is EXACTLY what they will do.

In His mercy, perhaps in deference to the timidity of man, not to mention our shameless lack of faith, the LORD referred once again to His covenant in the book of Jeremiah:

“Fear ye not me? saith the LORD: will ye not tremble at my presence, which have placed the sand for the bound of the sea by a perpetual decree, that it cannot pass it: and though the waves thereof toss themselves, yet can they not prevail; though they roar, yet can they not pass over it?” - Jeremiah 5:22

Does not the LORD speak here of a “**perpetual decree**”? The sea cannot overstep the boundary established by God. He says also that He has placed the sand on the shore as a boundary for all to see, a line over which, by His sovereign decree, the sea will never pass.

So who is right, the wonderful God who created the world we all live in, or the wicked cabal who want it exclusively for themselves?

APPENDIX A

Ten Universal Principles of Climate Justice

The so-called *Ten Universal Principles of Climate Justice* are also known as *The Ten Principles of Climate Repentance*. They are promulgated in two forms, a short or 'mini' version, and a long version, as set out below. They appear to have been drafted and agreed by 'The Elijah Board of World Religious Leaders'. Created in 2003, the Board comprises about 70 leaders from all religious traditions, including Judaism, Christianity, Islam, Buddhism and those based mainly in India, such as Hinduism and Sikhism. The Dalai Lama is a member, as is the Hindu 'hugging' guru, Amma Devi.

Pope Francis sharing a platform with Guru Amma in 2014.

The Ten Principles for Climate Repentance:

(mini version)

1. We are stewards of this world
2. Creation manifests divinity
3. Everything in life is interconnected
4. Do no harm
5. Look after tomorrow
6. Rise above ego for our world
7. Change our inner climate
8. Repent and return
9. Every action matters
10. Use mind, open heart

The Ten Spiritual Principles for Climate Repentance

The Elijah Board of World Religious Leaders

Introduction

The leaders of the world are presently gathered in Egypt, during this time of great international tension and conflict, for the COP27 meeting. We support them with our deepest prayers and meditations. Theirs is the urgent work of addressing the practical challenges of climate change and for negotiating between nations, in an attempt to help humanity resolve the climate crisis. As religious leaders we offer our voice as a contribution to the gathered leaders and to humanity. Ours is a voice of hope and unity, grounded in a spiritual vision. From this vision, offered as common ground between diverse religions, a positive attitude to life is derived that can inform practical decisions and negotiations. It can also give hope and meaning to individuals struggling under the burden of climate anxiety, who seek to find their place and identify their responsibility at this time of crisis. We must also confront honestly the destructive habits which continue to limit the possibilities and the hopes of human beings, in a call for wake up and self-examination. With the following ten principles we seek to initiate a process of climate repentance, broader understanding, and effective action. Many practical consequences can be derived from the vision set forth here, as well as from the individual principles we offer. Our call is a call to action; and a call to return to a correct vision of the creation, the creator, and the harmonious relationship of humanity with creation.

God and the world – the Nature of Being

1. Creation is not our possession. The human person must recognize this and find his/her rightful place in relation to this fundamental fact. For some of us, this leads to a sense of gratitude for God's gifts and for the gift of life itself, wherein humanity takes its rightful place as partner and co-creator, in advancing the life of all creation. For others, creation itself is sacred.

Therefore: We recognize human responsibility to love and protect nature.

2. Creation is not simply external to God. It is, in significant ways, permeated by God's presence and being, manifesting the divine agency and reality. Such understandings are found in all traditions, whether as the universal view or as one voice among others. Alternatively, nature is permeated by the spiritual, manifesting ultimate reality in every particle.

Therefore: We must treat all of life with reverence.

3. Within creation, and between humans and other parts of creation, as well as among religious communities, there is interdependence. All are part of a greater whole wherein each element both receives and gives influence, impact, love, and growth.

Therefore: We must care for each other and the planet.

Humanity and Its Responsibilities

4. The distinctive task of humanity is to nurture and serve this interdependent life-giving, and so to resist the temptation to exploitation, waste, and harm. Acting in the interest of human well-being cannot be something pursued in separation from working for the well-being of the whole created order. This finds two prominent expressions:

- a. Commitment to not harm creation, and the responsibility to protect it.
- b. Commitment to serve, advance, and aid in the growth and evolution of all parts of creation.

Therefore: We recognize that we are responsible for the wellbeing of all life today, as well as for future generations.

5. The human person has capacities that are conducive to the realization of this vision, as well as forces that are destructive. Ego, self-centeredness, greed, arrogance, and more are negative traits stemming from a limited sense of the human person. These have the potential to destroy humanity and creation. The soul, or the higher aspects of the human person, have the capacity to realize the fuller vision of humanity's role in the broader scheme of the meaning of life and creation.

Therefore: A disciplined spiritual life is helpful in overcoming the challenges of climate change.

6. There is an inherent relationship between the human person (within) and nature and objective reality (without). Thoughts, speech and action have the capacity to bring harm or to heal.

Therefore: Use thought, speech and action only for the good.

7. Based on this understanding of the human person and his/her role in creation, the processes of growth, transformation, return and repentance are fundamental to human existence.

Therefore: The human person is benefitted by the ongoing effort to purify, raise, and transform himself, in view of a higher vision.

Living in Spirituality and Responsibility

8. There are reactions when we harm the earth and others. Actions have consequences and no action can be ignored. The weight of our actions and their short and long term consequences lead us to find ways of mitigating harmful actions and to work for the good.

Therefore: Act knowing that every action counts.

9. Empowered by mind, reason and spiritual understanding, we adopt a mindful and attentive view of the natural world.

Therefore: take seriously the lessons and observations that humanity has reached by application of its mind in scientific study and through common reason.

10. The life of attentive, intelligent love is embodied in compassion: in openness to the pain and vulnerability of the world. Care for the other is expressed in love and compassion as fundamental spiritual principles. These are to be applied to other humans, human communities, and other parts of creation. Compassion means suffering with others – to feel the pain of the earth, of the poor, and of those who suffer the consequences of climate change. Opening our hearts to their pain will lead us to change.

Therefore: Be sensitive to the intolerable insecurities and injustices in which so many of our fellow humans live.
